

MORRIS VALVES®

SERVING THE WORLD, ONE PROJECT AT A TIME™

M67C TYPE

www.morrisvalve.com

In 1984, our journey into the business of repairing valves and industrial instrumentation began. That journey has led us to represent and service well known American brands and companies. In early 2000, our experience and growing passion for the valve industry encouraged our decision to launch our own brand, Morris Valves. Starting with the highly requested Ball Valves, the brand has been based on the principal of quality and performance to match our customers' needs. Our high standards of production later lead us to incorporate other models such as Gate Valve and Check Valves to our production. These additions were carefully selected to match our Standard of Quality. Our success has been driven by our belief of "Tradition with Quality" in everything we do. Our products are developed with that belief which drives our growth and guides the service we provide to our customers.

Our vision is to be amongst the leading corporations in the supply of goods and services related to valves, their components and industrial equipment in general. We want to conquer new markets in conformity with international standards and remain committed to customer satisfaction, the welfare of our company and the sustainability of our planet.

Mission

Our mission is to use our highly trained, highly focused, and extremely motivated staff to work with manufacturers who value quality and have the vision for new development and product applications to ensure the timely provision of goods and services related to valves, their components and industrial equipment in general. We maintain a rigorous standard of customer satisfaction, which will provide for the welfare of the company, the welfare of the countries we serve, and most importantly the sustainability of the planet.

M67C TYPE

Process gauges according to US standard

- Main Features.

- * Connection:1/4" NPT.
- * Inlet Pressure Rating:250psi
- * Output Ranges: 0-30psi, 0-60psi 0-120psi.

- Temperature Range:

- * 20f to 180f (-29c to 82c)

- Body and Housing Material:

- * Die Cast Aluminum.

Equipped with a filter for removing particles from the supply gas. Micron Rating: 5 microns

M67C Type Direct-Operated Regulators are typically used to provide constantly controlled, reduced pressures to pneumatic and electro-pneumatic controllers and other instruments. They are suitable for most air or gas applications. Other applications include providing reduced pressures to air chucks, air jets and spray guns.

CE APPROVED

| Capacities in SCFH OF 0.6SG Natural Gas | | | |
|---|--------------------------------|--------------|---------------|
| Inlet Pressure (Psi) | SPRING RANGE (OUTPUT PRESSURE) | | |
| | 25Psi (0-30) | 40Psi (0-60) | 80Psi (0-120) |
| 50 | 516 | 194 | |
